

Senior Manager Logistics Business Transformation & Sustaining (f/m/div)*

Job description

Would you like to participate in global projects to streamline and standardize logistics processes and be responsible to drive sustaining operation excellence? Are you a strong communicator who is able to play different roles and adapt very well to all counterparts? We have the right challenge for you at Infineon in Munich! Apply now to join our Global Logistics team as a Senior Logistics Manager and work in an exciting, multinational environment.

In this role, you will ensure all operations sustaining activities within our new SAP landscape while being part of a long-term global IT and business project. Key part will be to take care of process stability & -performance and to optimize and fine tune operations processes after go live and stabilization. Linking the sites with the new setup and the SAP-project, you will align meaningful optimization measures with project activities and template processes while being the key communicator towards the logistics community managing the changes. Here you will experience creative flexibility and the exciting collaboration in global teams.

Your tasks:

- **Ensure smooth and state of the art worldwide logistics operations sustaining** closely connected to the **worldwide oneSAP project**.
- **Member of the extended team of the “Warehouse & Shipping” track** within the global project to **introduce SAP S/4 Hana** as Business Representative for **worldwide logistics operations**.
- **Support of the analysis of current procedures** considering end to end process optimizations, identifying improvement potentials and risks throughout the operation.
- **Sustain oneSAP Operations and running the solution for Logistics for relevant sites** after project go live, hypercare and stabilization with a close follow-up on open topics (bug fixes, incident- / pareto analysis, problem identification, retrofits).
- **Act as first point of contact for oneSAP-sites and manage Change Requests (CRs)** including validation and prioritization in close alignment with stakeholders.
- **Ensure process stability and performance** by monitoring of the logistics process execution and pro-active interaction with sites operating in the new setup.
- **Drive incident- & performance reviews on target achievement** by analysis of global warehouse- and shipping-KPIs together with SOPS (SAP Operation and Project Services) and derive corrective actions.
- **Optimize and fine tune operations processes**, foster know-how sharing and participate in projects affecting oneSAP warehouse/shipping processes.

Profile

With your expertise and skills, you take care of sustaining the operations in a new setup, recognize and seize potential for improving efficiency and ensure that decisions are taken professionally. Simultaneously, you remain aware of the big picture and manage priorities even in complex situations and take decisions despite uncertain circumstances. You demonstrate strong communication skills and know how to establish lasting relationships and networks. As a true team player, you are aware of cultural differences, cooperate across boundaries and appreciate the contributions of other people.

You are best equipped for this task if you have:

- **University degree in Business Administration, Economic Engineering, Business Informatics** or adequate with a focus on logistics or supply chain with minimum of 4 years.
- **At least 6 years of professional experience within an international company with global material flows**, in logistics operations and projects (also as project lead), including relevant IT systems (**esp. SAP**).
- **Excellent analytical skills** to anticipate or identify critical areas within complex networks, to derive standardized and optimized processes covering local needs and to structure and define improvement measures.
- Very good **communication skills**.
- **Deep understanding of Supply Chain interdependencies** considering global/local needs and requirements (for specification of business requirements to get transformed into IT solutions).
- **Good understanding of financial flows, customs and export control regulations, legal and tax requirements** regarding international logistics processes.
- **Very good understanding of relevant IT systems**, with a **deep knowledge of SAP ECC6 (MM, WM and SD)** as well as **S/4HANA (EWM, TM of advantage)**
- **German and English fluent**.
- **Readiness for regular business travels** to e.g. Asia.
