

## Senior Project Leader Standard Cells and Timing Signoff (f/m/div)\*

### Job description

We are offering a position in our team for standard cell development and timing signoff (TSO). Your task will be the preparation and control of standard cell library as well as special library deliveries for Infineon products. Standard Cells are the main building blocks to create digital and computing chips and are used in a wide variety of Infineon products. Therefore, you will be in touch with standard cell libraries across a variety of state-of-the-art processes, but also for the latest ones. Furthermore, you will participate within the further development of methods and improvements of the standard cell delivery process. The PJM Career is meant to provide an attractive career opportunity for employees who focus on managing projects and functional leadership of project team members.

In your new role you will:

- Act as **work package owner for standard cells and timing signoff** within the Infineon design systems
- **Align content and dates for deliveries from standard cells and timing signoff** with design system managers
- **Support important milestones** based on the deliveries in your area of responsibility
- **Align, plan and schedule deliveries of standard cell libraries and TSO deliveries** with the team
- **Check deliveries** as well as **communicate and create necessary reports**
- Act as **project manager for methodology development projects** for standard cell and TSO team as well as surrounding groups

### Profile

You are enthusiastic about teaming up with your international colleagues to provide leading-edge chip methodology and always find the best solutions to be applied to our products. Thereof you keep the customer informed appropriately, transparently, and regularly as well as you weigh up opportunities and risks carefully.

You are best equipped for this task if you have:

- A technical **degree in Electrical Engineering, Computer Science, Physics** or a similar qualification
- At least **3-5 work experience in technical topics**, e.g. chip design or experience as a project leader in project management or workpackage ownership
