

## Senior Manager Program Management Sensor Modules - Silicon Microphones (f/m/div)\*

### Job description

We are looking for a proactive customer-focused entrepreneur with deep technical understanding to work on innovative projects in our Power & Sensor Systems (PSS) division. We are offering a great opportunity as Senior Manager Program Management, where you can define, set up and guide selected projects related to the microphone packaging programs together with our functional leads. In this role you will work in a global, dynamic and international team besides driving the microphone packaging program strategy.

In your new role you will:

- **Act as Project Owner** for selected projects related to the microphone packaging programs
- **Set up, develop and lead the microphone packaging program strategy**
- **Initiate and secure buy-in as well as support** of all stakeholders and **set up steering** with senior executive management to ensure project execution and progress
- **Act as internal and external interface** in regards to all technical and business aspects of the microphone packaging program
- **Align with internal stakeholders** on roadmap priorities and resource requirements (e.g. product marketing, R&D, etc.) and **manage escalations**
- **Define, trigger, guide and track technical and business capability projects** to secure execution

### Profile

You have a strong customer-oriented vision while putting the customer at the heart of your thoughts and actions – internally and externally. As a real entrepreneur, you focus on results while staying aware of costs. Additionally, you strengthen the team spirit, fight for the best solution and jointly execute it successfully.

You are best equipped for those tasks if you have:

- A **degree in physics, mechanical engineering, electrical engineering** or similar, a PhD and/or MBA as a plus
- **At least 6 years of work experience** as an interface between commercial and technical areas in engineering, project management, marketing, development, strategy or business consulting
- **Solid backend, sensor module, financial and contractual understanding**
