

Senior Engineer - Quality Management System

Job description

Are you a talented engineer with a passion for quality topics? Do you live up to high quality standards and look actively for the ideal solution? Take on this challenging opportunity and be the key contributor to support and improve our Quality Management System (QMS). We look forward to hearing from you!

In your new role you will:

- **Lead and support internal and 3rd party audit (ISO9001/IATF16949/VDA6.3)** to ensure continual certification of the organization
- **Deep dive into audit findings and internal deviation** to improve organization Quality Management System
- **Drive improvement actions** from all internal and external audits to improve organization quality level
- **Manage Document Control and FMEA System** & drive for process and system improvement
- Collaborate with cross functional team to **review and improve the existing quality system, tools and methods** within the organization
- **Support the deployment of new QMS tool** to the organization through training and collaboration with Corporate Quality Management and backend cluster for tools release

Profile

Continuous improvements are important to you. Your actions are characterized by a high sense of quality and responsibility. You have excellent problem-solving skills and stay focused under pressure. Furthermore you inspire others for your innovative ideas and create a positive mindset for quality awareness.

You are best equipped for this task if you have:

- Bachelor's Degree with **more than 5 years** of experiences in **Semiconductor Industry** or relevant, preferably with exposure in **backend manufacturing processes (assembly, test, pack)**
- **More than 5 year experience in Quality management System role**, with knowledge and certified on Quality Standard (ISO9001/IATF16949/VDA6.3)
- **Proficient in Quality Tools** such as **Statistical Process Control (SPC), Failure Mode Effect Analysis (FMEA)** and has experience in deploying the quality tools in the manufacturing line
- **Bilingual and good communication skill** with external and internal stakeholders
- **Good interpersonal skills** to team up with cross functional team for best results
