

## Project Manager

### Job description

#### Project Manager

Infineon Technologies is seeking a Project Manager with experience in microcontroller and/or wireless embedded systems development to join our team in India working on building the next generation of IoT software and silicon. Your responsibilities would include leading new development projects from launch to production, consisting of large global teams in a matrixed management configuration.

You will be expected to understand technical details and have a background in silicon and/or software development with a desired experience across the full product development cycle.

You will monitor and report on overall project status by summarizing key project metrics both across the team and to upper management. You will be responsible for ensuring that work is delivered on time and budget. The right candidate will focus on early detection of issues and recommend mitigation actions to prevent impact to the project.

#### Responsibilities

- Manage a global matrix of cross functional product development teams
- Plans, organizes, drives, and controls the project.
- Responsible for the project execution success and ensuring achievement of the strategic project targets: scope, budget/effort, time.
- Detect and escalate issues before they impact the project
- Collect and present high level accurate status reports to executive management
- Understand technical issues and risks and ensure appropriate tradeoffs are made
- Monitor and enforce compliance to business processes

### Profile

- 10-15+ years total experience as a silicon or software developer with at least 5+ years Project Management experience
- Excellent verbal and written English communication skills
- Open to working in a collaborative environment and willing to challenge themselves and the team in order to deliver products to market in a fast moving industry
- Experience with numerous program management tools (Microsoft Project, JIRA) and both classic and agile development processes (scrum, Kanban, lean, etc.)
