

Staff Engineer Analog Mixed Signal Design incl. AMS Layout

Job description

Looking for candidates well-versed with AMS Verification on multiple SOC's or sub-systems.

- Candidate should have working experience with AMS Verification on multiple SOC's or sub-systems.
- One should have proficiency in AMS simulation environment using Cadence/ Synopsys/ Mentor tools.
- Knowledge of digital design techniques, Verilog HDL, and standard RTL coding styles, as well as analog circuit basics, with previous analog design experience a plus.
- Candidate should be familiar with the concepts of behavioral modeling - both digital (Verilog-D) and analog (Verilog-A or Verilog-AMS).
- Experience in SV and UVM testbench development/modifications from mixed signal perspective is a plus. Functional knowledge of analog and mixed signal building blocks, such as comparators, op-amps, switched cap circuits, various types of ADCs and DACs, current mirrors, charge pumps, and regulators is expected.
- Working knowledge of Perl / Skill/ Python/Tcl or other scripting relevant language is a plus.
- Candidate should have ability to lead a project team, and work collaboratively in a multi-site development environment.

Profile

- Work experience : 5 to 10 years
- Bachelors/ Masters in Electronics/Electrical Engineering
- Go getter - Taking calculated risks- multi tasking - Cross/Team communication Automation: Python/Perl
- HDL/HVL -: Verilog-AMS/SV-UVM

Benefits

- **Bangalore:** Coaching, mentoring & networking possibilities ; Wide range of training offers & planning of career development; Regional and local talent programs; International assignments; Career paths: Management career, Project management career, Technical ladder career, Individual contributor career,

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.
