

Senior Staff Engineer Digital Design

Job description

In your new role you will:

- Work closely with DV, system and FW teams to participate in feature development
- Debug issues with the DV, system, FW and DVT/SVT teams in design phase or those reported by external customers

Profile

You are best equipped for this task if you have:

- Typically requires a MSCS/MSEE degrees (8+) years of digital design experience
- Familiar with digital design flow: from RTL, simulation, synthesis, STA to silicon tapeout design flow
- Good Scripting skill (Perl or Python) is a must
- Familiar with BT MAC is a plus
- Familiar with 802.15.4 is a plus
- Self-motivated, good team worker and great learner
- Must be fluent in English

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.
