

Requirements and Configuration/Change Manager for Automotive Power Applications (f/m/div)*

Job description

The semiconductor business and tomorrow's technologies have always fascinated you? As a Requirements and Configuration/Change Manager you will dive into Automotive Power Applications. Does this sound interesting? Then we are happy to welcome you as part of our team in Bucharest. Bring in your experience and build up an expert network across sites and departments!

As a Requirements Manager you will be responsible to ensure requirement formal compliance to automotive standards, the acceptance by the project team and full requirement traceability from definition to implementation and verification. As Configuration/Change Manager you will be responsible for providing the infrastructure for identifying, versioning and baselining complete product documentation as well as ensuring transparency, evidence tracking and conscious decision making over changes during project lifecycle. At the same time you will act as a mentor/coach to the project team, in order to support them in the management of requirements and configurations.

In your new role you will:

- **Be responsible for Requirements Management (RQM) and Configuration/Change Management (CCM) Methodology and Process** for various types of automotive power projects (e.g: Motor Drives, Bridges, ePower)
- **Tailor RQM and CCM central processes and methodology to project needs**
- **Align with central division board regarding requirements flow, methodology and configuration/change management**
- **Implement RQM flow and CCM process, methodology and tools** across department projects in alignment with lead engineers within project team
- **Have ownership of project training plan** regarding RQM flow and CCM process, methodology and tools
- **Mentor / coach / general support colleagues** regarding RQM and CCM

Profile

With your very good communication skills, together with people orientation, you set the direction, motivate and steer the project teams towards an efficient requirement driven flow. Your methodical and organized working style support you in creating, maintain and promoting a structured working project environment. You are ambitious and drive tasks to completion. You have good technical background which enables you to moderate technical discussions focused on reaching team decisions.

You are best equipped for this task if you have:
