

Manager, FE Procurement

Job description

Are you **CURIOS**? As you fulfill standard purchasing duties, you will also ask questions, challenge assumptions, want to continuously learn and enjoy being an important part of a dynamic, talented, flexible, and highly supportive team. If this sounds like you then apply to Infineon's Manager FE Procurement role!

In your new role you will:

- Be responsible for regional **procurement** of production & facilities related capital, spares, consumables and services on a global supplier base.
- Responsible for frontend **commodity management** (commodity strategy, commodity/supplier sourcing, supply market analysis) and supplier management (supplier management/performance reviews, contract management) so as to drive optimal value for factory customers.
- Establish **controls** of key performance indices and plan for yearly supplier negotiations
- **Negotiate** and control contracts to secure supply and best conditions
- Promote continuous improvement of **supplier quality** and cost via cross-functional value engineering and optimization of supplier portfolio as part of a global company
- Occasionally be asked to do limited **travel**

Profile

You are best equipped for this task if you have:

- Minimum **6 years'** experience in commodity management role in procurement within a semiconductor manufacturing organization
- **Bachelor's Degree** in Engineering or Business Admin
- Strong **negotiation** and interaction skills
- Profound **problem solving** and cost analysis skills
- Experience in **supplier relationship** management and commercial contract management
- High **teamwork** spirit and intercultural / interdisciplinary competence
- Proficiency with **Excel, SAP or Oracle** will be an added advantage
- Ability to "**think outside of the box**" to problem solve and provide solutions
- **Flexible** and adaptable to situations and change
- Superpower of **multi-tasking** and juggling work to balance needs of the business
