

Director Application Management Autonomous Mobility (f/m/div)*

Job description

As Director Application Management Autonomous Mobility in the Vehicle Automation and Safety (VAC) segment, you adapt and deploy the global G2M strategy for the region, manage regional G2M activities on focus application level and feedback on customer/market acceptance of IFX solution offering. If this position sounds interesting to you, then apply now!

In your new role you will:

- **Adapt & deploy global G2M strategies for the region**, manage regional G2M activities on focus application level and feedback on customer/market acceptance of IFX solution offering
- **Lead business development and drive demand creation** activities to secure cross-product design-wins
- Be the **prime contact in region EMEA** in the Infineon global network of autonomous mobility applications
- **Coordinate cross-divisional offering** for focus applications
- **Provide regional needs** for collateral creation to Marketing Communication Content Manager and Digital Marketing Communication
- **Engage with regional ecosystem partners** in collaboration with Partnership and Ecosystem Management
- **Generate and optimize system strategies/portfolios in line with Business Line strategies** for the focus applications and focus product segments
- **Prepare regional long-term forecast (5y)** on application level tied to regional strategies
- **Define regional pricing strategy** for focus product segments and manage quoting outside of pricing office limits to capture value-based mark up

Profile

You are good at developing, coaching and mentoring your team with innovative spirit and your excellent communication skills. You are well organized and have process & structural competences. With your proven record in growing business for electronic products and your keen business sense, you are capable to identify opportunities and convert leads to business. Strong marketing and analytical skills with excellent strategic thinking and team working spirit complete your profile.

You are best equipped for this task if you have:

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

– Automotive (ATV) shapes the future of mobility with micro-electronics enabling clean, safe and smart cars –

Semiconductors are essential to realize key trends like eMobility, automated driving and secure, connected cars. Infineon **ATV** is the #1 semiconductor partner in the fast-changing automotive world, based on our system knowledge coupled with our passion for innovation and quality. We are a key driver in the ever-advancing pace of digitalization in the automotive industry.

** The term gender in the sense of the General Equal Treatment Act (GETA) or other national legislation refers to the biological assignment to a gender group. At Infineon we are proud to embrace (gender) diversity, including female, male and diverse.*
