

Senior Manager Embedded Software Development (f/m/div)*

Job description

Are you a leader, an entrepreneur, who loves to break new ground and shape things? You are curious about advanced technical solutions, have a passion for software, love building teams and are ready to shape the future digitalization of Infineon's IPC business with us? In this position, you will be at the forefront of developing completely novel software solutions for simpler, safer and greener power electronics products as well as AI based solutions across a wide range of application areas.

In your new role you will:

- **Be responsible for the setup of the new team** including the establishment of close connections to the global IPC organization (e.g. Application Marketing and Management, Technical Marketing)
- **Take over the management responsibility for the central embedded software development including IP generation, pipeline planning and project management**
- **Execute projects for embedded software** (Middle- and Firmware) with the team mainly addressing IPC focus applications (e.g. Home Appliance, EV charging)
- **Develop competencies in collaboration with other parts of the organization**
- **Provide technical guidance** for specification and requirements of software projects

Profile

You remain aware of the big picture even in complex situations and take decisions despite uncertain circumstances. With your foresight, you work conscientiously on making things better, faster, and more efficient. You are an ambitious leader and a true team player who collaborates beyond borders and appreciate the contribution of others, demonstrating active knowledge transfer and best practice sharing. You know how to make use of your potential and motivate yourself and others to achieve top results and performances.

You are best equipped for this task if you have:

- A successfully completed **university degree in computer science or electrical engineering**
- At least **5 years' experience in leading a team in the area of embedded software development**
- A **substantial amount of experience with professional software development**
