

Senior Expert Change and Configuration Management (f/m/div)*

Job description

Do you like the challenge of understanding complex technical projects and want to work across a diverse project organization? Do you enjoy defining new processes as well as working operationally within a fast-moving environment? Then this position could be the right fit for you: As Senior Expert Change and Configuration Management (CCM), you will enable your colleagues from business division - Automotive (ATV) - to realize their projects based on Infineon's AURIX microcontroller.

In your new role you will:

- **Be responsible for operational CCM**, which includes
 - **Planning product structure**
 - **Configuring baselines**
 - Organizing **change control board meetings**
 - Producing and reviewing **milestone documentation** including **change reports** and **baseline management records**
- Contribute to **future process development** and **tool landscape strategy**
- Work with **counterparts in other business lines** within ATV to **align on division wide CCM topics**
- Manage **improvement activities** and **internal stakeholder CCM requirements**
- Create **training material** and contribute to the communication and **roll-out of CCM processes**

This position is suitable for full- and part-time

Profile

As a true team player, you know how to cooperate across boundaries, respect different points of view and use the creative potential they offer? Furthermore, while striving for excellence, you work conscientiously on making things better, faster, and more efficient? If you are also known for your excellent communication skills and pushing ideas to their full implementation, then join our team!

You are best equipped for this task if you have:

- A **degree in Engineering** or in a comparable technical field

At a glance
