

Senior Director Project Management (f/m/div)*

Job description

The major key to success in this position, are cross-cultural awareness and excellent communication skills. You will decide and drive consequent implementation of quality standards, processes and methodologies and manage a worldwide distributed project manager pool for test technology development. You aspire to outstanding results with a passion? You act as an entrepreneur, focus on results and stay aware of costs? Then our position might be a good match for you.

In your new role you will:

- Support the **Project Portfolio Manager** for Test Technologies on **definition, planning, resourcing and budgeting** of all project-structured activities world-wide
- **Manage Sub-portfolios** equivalent to class B projects (according IPMA classification)
- **Cooperate with R&D Excellence** to define our test development processes of tomorrow
- **Coach project managers world-wide** and promote project management processes and methods
- **Introduce new** project processes, methodologies and tools
- **Manage our project manager resource pool** world wide

Profile

You pursue ambitious goals and are prepared to take risks consciously and manage them actively. You can inspire others and encourage them for the common goal and acts as if Infineon were your own enterprise.

Who we are looking for:

- You are well equipped for this position with a **degree in Economics, Electrical Engineering, Industrial Engineering, Physics** or a similar field of interests.
- At least **10 years of professional experience** within a **semiconductor environment** with proven **leadership experience**
- More than **10 years'** experience in a **technical project environment**
- **Project management coaching experience** and IPMA-B certification or IPMA-C certification and proven class B project management capability (e.g. successful management of at least two class B projects)
- Project management experience **outside of the semiconductor business** is an important enabler to manage a project manager pool which acts in a high complex cross organizational environment with a high variety of project types
