

## Manager, ESH

### Job description

This is a great opportunity for an experience ESH professional to manage the occupational safety & health, and environmental protection programs in Infineon's R&D labs and office sites across the US. Apply now, if this sounds like you!

#### In your new role you will:

- Stay apprised of current and upcoming **local, state, and federal regulations** and ensure operational compliance accordingly
- Manage occupational safety & health, and environmental protection programs in R&D labs and office sites across the US, with responsibility for results in terms of costs, methods, and employee's capabilities
- Drive the **execution of an effective incident reporting** and analysis process providing effective root cause analysis, actions that prevent recurrence, lessons learned, and quality data
- Support the **case management program** that includes Workers' Compensation. Deploy a risk assessment process that systematically and sustainably reduces risk of injuries, illnesses, and environmental impact
- Deploy a comprehensive and standardized **waste management process**. Develop and administer budgets, schedules, and performance requirements for critical service providers
- Conduct meetings involving environmental, health and safety, training and awareness programs
- Provide direction to employees according to established policies and management guidance, act as subject matter expert to business segments, and get involved as required to meet schedules or resolve problems. Interact frequently with site leadership, supervisors, and/or functional peer group managers
- Conduct presentations of technical information concerning specific projects /schedules, etc.
- Support all regulatory inspections and communications with regulatory agencies or external and internal inquiries
- Support the **ISO 14001/45001 certification** for selected R&D and office sites.
- **Train staff** on any changes to policy and procedures.

### Profile
