

Lithography / Plasma Etch Senior Process Development Engineer

Job description

Partnering with production module/department, technology integration, planning, business divisions and global process development counterparts in mapping and enabling future technologies

In your new role you will:

- Perform process transfer, process development, optimization and qualification for technology transfer/ development.
- Perform new equipment start-up which involves process characterization and development.
- Development of innovative processes and process characterization methodologies for existing and new technologies.
- Partnering with production module/department, technology integration, planning, business divisions and global process development counterparts in mapping and enabling future technologies.
- Perform process stability, sustaining and improvement to meet overall company targets.
- Perform integration block re-use and tool extendibility to maximize re-use strategy.
- Perform FMEA, risk assessment of process changes and process change management.
- Initiate, coordinate and support excursion prevention, productivity and quality improvement projects.
- Interface between production module/department, technology integration & quality engineering on daily routines.

Profile

You are best equipped for this task if you have:

- Bachelor/Master/PhD degree in Engineering, Physics, Chemical, Material Science or Applied Science.
- At least 3-5 years working and hands-on experience in wafer fab Plasma Etch or Litho processes, and related equipment engineering.
- Experience and have good methodical technique in technology synchronization, process optimization and harmonization.
- Good knowledge in semiconductor unit processes, process integration, device physics and products will be of added advantage.
- Good hands-on experience on wafer fabrication processes, equipment and metrology.
- Technology and or product transfer, qualification and high volume ramp-up know-how.
- Highly innovative, motivated and stress resistant individual with zero defect mind-set.
- A good team player and able to communicate effectively in cross functional teams and at all levels.
