

Senior IT Business Analyst for Information Management (f/m/div)*

Job description

Do you want to be part of our success story? Infineon is on its journey towards a new high-tech chip factory by harmonizing our 300-mm thin wafer lines in Villach and Dresden to create one virtual 300-mm mega fab! This enables us to shift production volumes for different products quickly between the two sites and respond even faster to the needs of our customers. As a Senior IT Business Analyst, you will be focusing on solutions in the Information Management area that are used in the Fab locations (based on HCL Domino Notes and workflow based manufacturing solutions) to enable high automation and growth at Infineon.

In your new role you will:

- Drive projects to **deliver Information Management IT-Solutions** for our new factory – in close collaboration with the Business, IT and Management
- **Transform business requirements into IT solutions** and integrate them into our existing landscape
- Act as an **application owner**: you will define, manage and support users of the application while ensuring stability, performance and good integration with other manufacturing applications
- **Drive application roadmap** based on the IT and Business roadmap
- Actively improve the solution landscape through test automation, technical analysis, best practice sharing and training
- Communicate and present technical requirements to various key stakeholders
- Collaborate with internal cross-functional teams and external service providers in a global environment

Profile

With your creative problem solving skills and focus on solution delivery, you are able to successfully deliver the best IT solution for your customers. You are proactive and enjoy the challenge of managing projects in a fast paced and dynamic environment. As a true team player you foster a collaborative working style within your area of expertise.

You are best equipped for this task if you have:

- A degree in Information Technology, Computer Science or in a related field
- At least 5 years of relevant professional experience in **IT business/technical consulting and managing projects**

At a glance

Location: **Munich (Germany)**
Job ID: **328774**
Start date: **as soon as possible**
Entry level: **3-5 years**
Type: **Full time**
Contract: **Permanent**

Bari Guritno
Talent Attraction Manager

- Hands on experience in **IT application ownership** (especially **manufacturing applications** is advantageous)
- Good knowledge of **technical trouble shooting in client/server environment** in a complex enterprise setup (e.g experience with **HCL Domino Notes**, LotusScript, JavaScript is advantageous)
- **Excellent German** and English language skills
- **Willingness to travel** to our sites in Dresden and Villach to collaborate with key business users

Benefits

- **Munich:** Coaching, mentoring networking possibilities; Wide range of training offers & planning of career development; International assignments; Different career paths: Project Management, Technical Ladder, Management & Individual Contributor; Flexible working conditions; Home office options; Part-time work possible (also during parental leave); Sabbatical; On-site creche and kindergarden with 120 spots, open until 6pm; Holiday child care; On-site social counselling and works doctor; Health promotion programs; On-site gym, jogging paths, beachvolleyball, tennis & soccer court; On-site canteen; Private insurance offers; Wage payment in case of sick leave; Corporate pension benefits; Flexible transition into retirement ; Performance bonus; Reduced price for public transport and very own S-Bahn station; Access for wheelchairs

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

The **Information Technology department** has become an important business advisor for Infineon, converting business requirements into great IT solutions. It is responsible for provisioning hardware and software solutions at benchmark costs for all areas within Infineon reaching from office users to research & development, to frontend and backend production around the globe. More than 1200 IT-colleagues work closely together with other business areas and external partners. They increase the efficiency of business processes offering more than just modern equipment, secure infrastructure and newest communication solutions.

** The term gender in the sense of the General Equal Treatment Act (GETA) or other national legislation refers to the biological assignment to a gender group. At Infineon we are proud to embrace (gender) diversity, including female, male and diverse.*
