

## Sr Staff Applications Engineer

### Job description

Infineon IOT Business Line is looking for a senior member for the applications team to provide design proposals and technical definitions for firmware, middleware, and hardware blocks.

- The main tasks of this role would be:
  - Provide Design proposals and technical definitions for Firmware, Middleware, and Hardware blocks.
  - Work cross-functionally with Marketing, Customers, and Design teams to create suitable product solution.
  - Create technical articles, Application notes and represent tradeshows and external forums.
  - Enable Design-win projects using Infineon's IoT portfolio involving wireless technologies like Bluetooth, BLE, Matter.
  - Plan and execute projects along with other team members.
  - Initiate and drive creative end solutions using product's capabilities and feature set.

### Profile

You are best equipped for this role if you have:

- Work experience of 8-14 years in embedded system development.
- Strong knowledge of system-level design and architecture in the embedded domain.
- Ability to debug and solve complex issues with hardware and firmware integration.
- Attention to detail, Proactive problem solving and self-driven.
- Mentor and guide junior team members.
