

Digital Design Engineer

Job description

Infineon is hiring creative Digital Design Engineers. Utilize your strong skills with RTL, simulation, and verification to build leading IoT & Automotive products. We have multiple positions with different locations if you have the skill and want to elevate your career. Location includes Colorado Springs, CO or San Jose, CA or Lexington, KY or Lynnwood, WA or Austin, TX.

In your new role, you will:

- Responsible for the design and development of **Digital Circuits** along with the characterization of System Resource IP on Silicon.
- RTL design, logic simulation and verification, **R TL synthesis, STA, and ATPG**.
- Scripting various tasks for process automation
- IP block constraint development, promotion to full chip-level, and interfacing with full chip assembly teams to complete the constraint integration.
- Interfacing with cross-functional teams located around the globe at multiple Infineon locations
- Characterization of **IP blocks on silicon**
- Supervising and mentoring junior team members

#LI-MH1

Profile

You are best equipped for this task if you have:

- Master's degree with 3 years of experience or Ph.D. degree in Electrical engineering or related equivalent.
- Experience with **RTL design** in Verilog HDL and VHDL , simulation, verification, timing analysis, power analysis, synthesis, and implementation of Embedded Systems and Digital IP Blocks.
- Programming experience in C/C++/Embedded C, Python, Tcl, and shell.
- Experience with common Computer-Aided Design Tools
- Nice to have experience in mentoring

Why Us

At a glance

Location:	Colorado Springs, CO (United States)
Job ID:	329720
Start date:	as soon as possible
Entry level:	5+ years
Type:	Full time
Contract:	Permanent

Part of your life. Part of tomorrow.

We make life easier, safer, and greener – with technology that achieves more, consumes less, and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

The Connected Secure Systems (CSS) segment offers comprehensive systems for a secure, networked world with a portfolio built around reliable, trendsetting microcontrollers as well as wireless connectivity and security solutions. Over the past decades, CSS has developed microcontroller, Wi-Fi, Bluetooth, and combined connectivity solutions (known as connectivity combos) and hardware-based security technologies. The products are used in a broad range of applications: from consumer electronics, IoT, and home appliances to IT equipment, cloud security, and networked cars all the way to credit and debit cards, electronic passports, and IDs. With its leading technologies in the areas of computing, connectivity, and security, CSS makes a decisive contribution to protecting today's and tomorrow's networked systems.

Cypress Semiconductor Corporation is an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex (including pregnancy, childbirth, or related medical conditions), gender identity, national origin, ancestry, citizenship, age, physical or mental disability, legally protected medical condition, family care status, military or veteran status, marital status, domestic partner status, sexual orientation, or any other basis protected by local, state, or federal laws. Applicants with questions about access or requiring a reasonable accommodation for any part of the application or hiring process should contact the Talent Network by phone at (408) 503-2194.

Employment at Infineon is contingent upon proof of your legal right to work in the United States under applicable law, verification of satisfactory references and successful completion of a background check and drug test, and signing all your onboarding documents .

In some instances, if applicable, U.S. export control laws require that Infineon obtain a U.S. government export license prior to releasing technologies to certain persons. This offer is contingent upon Infineon's ability to satisfy these export control laws as related to your employment and anticipated job activities. The decision whether or not to submit and/or pursue an export license to satisfy this contingency, if applicable, shall be at Infineon's sole discretion.

IMPORTANT NOTICE:

Infineon is requiring all new U.S. employees and contractors to be fully vaccinated against COVID-19. Full vaccination is defined as two weeks after both doses of a two-dose vaccine or two weeks since a single-dose vaccine has been administered. Anyone unable to be vaccinated, either because of a sincerely held religious belief or a medical condition or disability that prevents them from being vaccinated, can request a reasonable accommodation.

Infineon Technologies takes data privacy and identity theft very seriously. As such, we do not request personally-identifiable information (PII) from applicants over the internet or electronically. Please kindly refrain from disclosing your PII electronically during the application process or to unauthorized websites that may purport to be Infineon or any of our affiliates.
