

Supplier Quality Manager (f/m/div)*

Job description

Quality and efficiency are key-drivers for successful results and Quality Management is the customer advocate, striving to ensure our customers come back. Do you agree? If you live up to high-quality standards and have a strong focus on continuous improvement, you should be in our team. Join us as a Supplier Quality Manager in Cegléd and support our drive to the most successful outcomes!

As our next Supplier Quality Manager you will be responsible for delivering all aspects of the supplier operations quality function in line with quality management processes and policies, ensuring our products meet the customer expectations. Moreover, you will be managing critical situations, focus teams and task force, while reviewing and assessing manufacturing procedures. You will look for flaws and issues with quality and provide guidance aiming to reduce defect rates.

In your new role you will also:

- Actively **participate in supplier-related improvement projects**;
- Organize and **manage supplier workshop activities, technical visits, and audits**;
- **Audit follow-up activities**, prepare the **actions list**, and ensure the **achievement of the defined targets**;
- Take part in **supplier selection activities** (decision matrix, SLM database applications);
- Perform **supplier potential analyses**;
- Engage in **new material release activities**.

Profile

You are an open-minded, self-organized and persistent all-rounder with an interest in technology. You live up to high quality standards and your strong communication skills allow you to establish lasting relationships and networks. You enjoy interaction with people from different backgrounds, are a strong team-player and able to effectively lead projects. You evaluate information from different points of view and are not afraid of putting decisions into practice as soon as the actions are established.

You are best equipped for this task if you have:

- A college or university **degree in Engineering** or a related field.
- At least **3 years experience** in a production environment;
- A solid **quality management background**;
- **Supplier Quality management** skills;
- Good command of **English**. **German** would be an advantage.

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

Backend

The backend segments enable the development of comprehensive innovation across the entire value chain: starting with chip manufacturing, to wafer testing, preassembly, package development and development of new materials. The backend cluster combines the competencies for planning, productivity, innovation and quality, assembly and testing.

** The term gender in the sense of the General Equal Treatment Act (GETA) or other national legislation refers to the biological assignment to a gender group. At Infineon we are proud to embrace (gender) diversity, including female, male and diverse.*
