

Senior Manager Supplier Quality (f/m/div)*

Job description

As Senior Manager Supplier Quality (f/m/div)* you will work intensively with our suppliers to ensure quality and delivery performance. In doing so, you will act at the interface between the suppliers and our production, development and purchasing. By developing and leveraging all competencies and capabilities of our suppliers, you will sustainably shape Infineon's innovation capabilities and productivity and thus significantly support our business success. Have we raised your interest? Then we look forward to receiving your application!

In your new role you will be responsible for:

- The **initiation of measures and projects for quality optimization with suppliers** incl. on-site support
- Ensuring **specifications and processability of materials**
- **Supplier selection** and evaluation on the basis of audits
- Active support in the **technical development of the supplier portfolio** and the **production materials** utilized
- Continuous **improvement through interdisciplinary and cross-site cooperation** with R&D, marketing, logistics and quality management departments
- The **execution of supplier negotiations** of delivery conditions and material specifications

Profile

With your strong conceptual and analytical skills and your assertiveness, you communicate at eye level with our suppliers. With your many years of experience, you are able to create value with your ideas, challenge the status quo and courageously explore new horizons. In doing so, you react in a solution-oriented manner, even under pressure, and remain open and flexible. You know how to inspire internal and external contacts for your ideas and thus lead your projects to success.

You are best equipped for this task if you have:

- A successfully completed **university degree in industrial engineering or engineering** (e.g. materials science, physics, electrical engineering)
- **Several years of relevant professional experience in a related field** (e.g. purchasing or quality department), ideally in the semiconductor/ electrical or automotive industry
- **Several years of experience as a project manager**, ideally in the automotive/ supplier industry
