

## Inspection Systems Engineer (f/m/div)\*

### Job description

Are you a strategic thinker, quality-oriented, and focused on getting solutions? Do you thrive in a team environment and are excited about contributing with your innovative ideas and reliable solutions to the company's success? We have the perfect challenge for you if you want to work in a dynamic multicultural environment. Join us in Cegléd as our new Inspection Systems Engineer!

As an Inspection Systems Engineer, you will play a crucial role in discussing the best automation solutions ensuring high-quality standards and continuous process efficiency and improvement. You will also work closely with the local departments in Cegléd and take advantage of acting on an international stage by collaborating with other Backend sites.

In your new role you will:

- Develop solutions for **optical image processing and inspection**.
- Substitute manual inspection steps through **image processing and non-destructive testing methods** (AOI, X-ray, USM).
- Develop **new inspection concepts** during the introduction of innovative products as well as the existing production.
- Integrate innovative production equipment with **automated visual inspection and automated solutions into operations** (FOAK).
- **Enhance production quality and efficiency** with automated image recognition (AIR).
- Configure the **site roadmap Imaging Inspections**.
- Investigate **problems**, determine **root causes**, and implement **corrective and preventive actions**.

### Profile

You are interculturally versed and enjoy interaction with people from different backgrounds, being thrilled to work in a cross-functional global network of experts. With your precise working style and analytical thinking, you always focus on results and solve problems in an efficient way. Your strong communication skills make you a great team player and allow you to easily coordinate your work with your colleagues. Moreover, you are able to quickly establish sustainable relationships and make presentations to large audiences.

You are best equipped for this task if you have:

- A University or College degree in **Electrical, Mechatronics or Automation Engineering** or similar field of studies.
