

Senior Expert Quality Management (f/m/div)*

Job description

Are you passionate about innovation and quality? Are you looking for a new challenge within the semiconductor industry? At Infineon, you can work on cutting-edge wireless RF communication technologies, e.g. for 5G applications, in a highly dynamic, fast-paced environment and be part of our company's success. Apply now and join our team as a Senior Expert Quality Management.

As a Senior Expert Quality Management, you will take over responsibility for the quality of a defined group of Infineon products. You will work in interdisciplinary project teams to ensure that customer/market requirements are met and to further strengthen Infineon as a quality leader.

In your new role you will:

- Take ownership of the **definition and development of product qualification strategies and methodologies** for wireless communications products, technologies and packages;
- Plan and perform effective and efficient **product qualifications and reliability tests** in compliance with internal guidelines, external standards, to ensure that market and customer quality requirements are met;
- Provide final **qualification reports** for customer release and internal documentation;
- Interact with our **international customers** regarding quality-related topics;
- Contribute to the entire **product development process and risk management**, bring in quality method competencies and ensure process compliance;
- Evaluate **failure modes** and ensure that the right measures are taken in case of observed deviations;
- Drive effective **problem-solving for quality issues**, leading or being part of task forces or focus teams;
- Initiate and drive **quality improvement projects**, actively sharing your quality and reliability expertise in the community.

Profile

You enjoy working independently and take responsibility for your own work, evaluating opportunities and risks in a structured manner. As a team player, you collaborate constructively and trustfully within an international team. Furthermore, you are passionate about quality and have a proactive and open mindset that contributes to innovation.

You are best equipped for this role if you have:
