

Industry 4.0 Engineer (f/m/div)*

Job description

Are you a curious and innovative person who is keen on solving complex problems? Do you have a collaborative mindset and a constant focus on quality and efficiency? At our production site in Cegléd, you will drive the latest technology! Join the team as our new Industry 4.0 Engineer and face a stimulating career challenge!

As an Industry 4.0 Engineer, you will drive the Industry 4.0 revolution at Infineon in Cegléd. As part of the recently formed Industry 4.0 Automation department, you will contribute to the digitalization of the site, playing a crucial role in digitalization rollouts on the Automated Process Control area. You will also actively participate in strategic projects that aim to integrate specific equipment and processes while ensuring their stability and thus meeting overall production targets.

In your new role you will:

- **Drive further digitalization rollouts** with a special focus on the Automated Process Control area.
- Act as a **project manager** (being responsible for the project scope, time, and budget), leading the rollout of new solutions.
- Understand **production requirements and processes/work methods** and **translate them into digital solutions**.
- Take responsibility in the pillar of the related **automation roadmap**, acting as the **site responsible** for the pillar – you will define the site strategy and lead the execution of the roadmap and the harvesting of the results.
- Act as an **interface with Global Infineon I4.0 Community**.
- Maintain **stability of released digital solutions** – participate in the root cause analysis of critical issues, develop and perform corrections to stabilize and improve the system.

Profile

Your IT mindset and interest in digitalization make you a highly innovative person. You have a great set of analytical skills that allow you to solve problems in an efficient way. Even when under pressure and facing complex situations, you remain focused on solutions, and as a team player, you share all the important information contributing to the team success by taking advantage of your zero-defect mindset. Moreover, you are willing to take responsibility and are thrilled to work in a cross-functional global network of experts, being able to make presentations to large audiences when representing the site on global platforms.

You are best equipped for this task if you have:

At a glance
