

Power Cluster Owner and Architect for Functional Safety (f/m/div)*

Job description

Are you looking for a new challenge? Are you used to work proactively and interdisciplinary? Are you ready to bring your know-how into an innovative, future-oriented company? Then Infineon is the place to be for you!

In your new role you will:

- Take over the **technical lead function** and **ownership for power cluster** on subsystem level
- **Contribute with innovative ideas** for **power saving architectures**
- **Actively interact with system architects** with **focus on power requirements** to find the global optimum for customer and subsystem
- **Team up for smart functional safety solutions**
- Be **strongly involved in the functional safety requirement capturing process** and defining safety goals
- Take the **responsibility for the workflow infrastructure** for functional safety

Profile

You are best equipped for this task if you have:

- **A university / university of applied sciences degree** in **Electrical Engineering** or comparable
- **At least 5 years of relevant working experience** within the **semiconductor industry**
- **Strong knowledge** of **system level concept** and **architecture**
- Outstanding **communication skills**
- **Out-of-the box thinking** capability
- **Fluent English skills** with German skills as a plus

You are the perfect match if you enjoy working with international, multi-cultural teams and are strong in decision taking.

This position is subject to the collective agreement for workers and employees in the electrical and electronics industry, employment group I (<https://www.feei.at/leistungen/informations-service/mindestlohne-und-gehalter>). A higher payment is negotiable depending on your expertise and skills.
