

Senior Software Engineer Cryptolib Documentation (f/m/div)*

Job description

As a Senior Software Engineer you produce high-quality documentation that contributes to the overall success of our products. You will join an experienced team of talented and experienced developers working in the domain of cryptography where you focus on making our products easy and well understandable by providing best-in-class documentation results as well as writing code examples for this purpose. This position is based in Augsburg or alternatively in Munich (Neubiberg).

In your new role you will:

- **Creation and update of a cross-platform User Interface Manual** describing a software component for cryptographic applications, using an existing documentation flow
- **Independently align on technical content** with software developers, application engineers, and security experts
- **Maintenance of multiple releases** of the document in parallel and on a demand basis
- **Managing of document review process** including approval in a DMS
- **Writing of example application code** to understand and explain the software APIs to customers
- **Improvement and maintenance of the document generation flow** in alignment with the central technical documentation team

Profile

You always strive for excellence and live up your high quality of standards. As a team-player you value and make use of diversity.

You are best equipped for this task if you have:

- A university degree in a relevant domain or professional skills with a focus on technical documentation, or a university degree in IT with additional training as a technical writer
- At least **2 years of programming experience using a common programming language such as C**
- At least **2 years of experience in technical software documentation using “close to the code” markup languages such as Markdown or Doxygen**
- At least **3-5 years of experience in technical software documentation using Doxygen, LaTeX**

At a glance

Location:	Augsburg (Germany), Munich (Germany)
Job ID:	332957
Start date:	as soon as possible

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

– Connected Secure Systems (CSS) delivers security for the connected world –

The **Connected Secure Systems (CSS)** segment offers comprehensive systems for a secure, networked world with a portfolio built around reliable, trendsetting microcontrollers as well as wireless connectivity and security solutions. Over the past decades, CSS has developed microcontroller, Wi-Fi, Bluetooth and combined connectivity solutions (known as connectivity combos) and hardware-based security technologies. The products are used in a broad range of applications: from consumer electronics, IoT and home appliances to IT equipment, cloud security and networked cars all the way to credit and debit cards, electronic passports and IDs. With its leading technologies in the areas of computing, connectivity and security, CSS makes a decisive contribution to protecting today's and tomorrow's networked systems.
