

Senior Engineer Process Development GaN Epitaxy (f/m/div)*

Job description

You want to become a part of a team which is responsible for development and further optimization of GaN epitaxy processes on 200mmSilicon substrates for power device applications to enable world class device performance? Take your chance now and apply as Senior Engineer Process Development GaN Epitaxy (f/m/div)* at our site in Villach!

In your new role you will:

- **Development and further optimization** of GaN epitaxy processes on 200mmSilicon substrates for power device applications to enable world class device performance
- **Handover of qualified processes and control concepts** to the production team
- Work in close **collaboration** with your colleagues in the process development and production team as well as the device development team in Villach

Profile

You are able to quickly **establish successful cooperations** and gain new insights by questioning existing assumptions. You **recognize and seize** potential for improving efficiency with determination and work perseveringly on making things better, faster, and more efficient.

You are best equipped for this task if you have:

- **University degree** in Physics, Material Science or Chemistry with focus on solid state physics or semiconductor physics
- Additional **PhD and R&D experience** in the field of semiconductor physics is a benefit
- Fluent **English** skills with **German** skills as a plus

We offer competitive salaries and additional benefits based on your performance, experience and qualification. The employment is in accordance with the collective salary and wage agreement for employees of the electrical and electronics industry, employment group G (<https://www.feei.at/wp-content/uploads/2021/04/minimum-salaries-white-collar-workers-2021.pdf>). The monthly salary is paid 14 times p.a. We offer a higher compensation depending on your expertise and skill

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

The **Frontend (FE)** cluster offers a broad range of manufacturing competence specialized in high-quality logic products. The portfolio represents Power, Bipolar, Sensor, Passive and Diode technologies as well as CMOS, RF-CMOS and embedded flash technologies. The manufacturing sites in Dresden, Kulim, Regensburg and Villach are committed to Operational Excellence with strong customer focus.
