

1-yr Internship: Application Engineering Lab Support

Job description

Infineon Korea is looking forward to working with a bright and passionate student for the internship position in Automotive Radar team, who will support the radar lab.

In your new role you will:

- Automotive ADAS radar validation
- Radar RF test and operate corresponding equipment
- Write MATLAB script for data collection and preliminary signal processing to extract meaningful output from the radar raw data
- Various radar testing for verification and validation

Profile

You are best equipped for this task if you have:

- Undergraduate in Electric/Electronic Engineering
- Capability in MATLAB
- Intermediate level of English
- RF-related experiences (Preferred)

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.
