

IT Staff Analyst Product Master Data Management for Digital Channels (f/m/div)*

Job description

Do you like to translate customer requirements into IT solutions? Are you passionate about delivering the best experience to Infineon customers? At Infineon, we are looking for an IT Staff Analyst, who further develops and maintains our Product Master Data for our web ecosystem and digital omni-channels to the next level: if you have an eye for the big picture, like to bring in new ideas and want to develop them in a global environment, we are looking forward to your application!

In your new role you will:

- **Consult** and **guide our Sales & Marketing departments** regarding **requirements** in the area of Product Data and Documents for Infineon's web presence
- **Design** solutions for Product Data and Documents, which support **customer's journeys** in the area of **digital demand generation**
- Manage and support **projects** for enhancements together with internal and external experts
- Drive **data validation** across different systems
- Ensure **operations** and **release management** of Product Data and Documents platform in close cooperation with internal and external suppliers
- Experience in **Electronics** or **Semi-Conductor industry** would be a plus
- Present and discuss results on **different management levels within IT** and with our **internal customers**, e.g. Sales & Marketing, Research and Development
- Assess risks, availability, capacity, and service level agreements.
- Act as **subject matter expert** in the area of master data management.
- Manage **vendors' and suppliers'** backlogs and deliverables.

Profile

As a true team player, you cooperate across boundaries, appreciate the contributions of other team members and respect their different attitudes and points of view. At the same time, you have a clear notion of how innovative IT solutions contribute to the commercial success of the company. In order to reach best results, you establish lasting relationships with your customers and listen actively to their thoughts and ideas. Furthermore, you know how to balance those requirements with technical or legal possibilities – and you are able to show them the added value of our available solutions.

You are best equipped for this task if you have:

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

The **Information Technology** department has become an important business advisor for Infineon, converting business requirements into great IT solutions. It is responsible for provisioning hardware and software solutions at benchmark costs for all areas within Infineon reaching from office users to research & development, to frontend and backend production around the globe. More than 1.200 IT-colleagues work closely together with other business areas and external partners. They increase the efficiency of business processes offering more than just modern equipment, secure infrastructure and newest communication solutions.

** The term gender in the sense of the General Equal Treatment Act (GETA) or other national legislation refers to the biological assignment to a gender group. At Infineon we are proud to embrace (gender) diversity, including female, male and diverse.*
