

Sr. Specialist Operations

Job description

You will be driving and delivering best-in-class planning and manufacturing execution processes for supporting Infineon customer needs. You will get an in-depth understanding of the entire supply chain via hands on problem solving. You will work cross-functionally with manufacturing, engineering and business teams to manage product availability and customer delivery across the worldwide supply chain using the latest i2/JDA APS (Advanced Planning System).

As a member of this dynamic team,

- You would understand customer's product requirements, and ensure that the supply chain is aligned to meet them
- Analyze problems and trends, and seek solutions to customer and business problems using a data-driven approach
- Participate in cross-functional initiatives that improve the overall business bottom line
- Work in an intense, fast paced and collaborative environment with shared responsibility across geographies
- Implement supply chain processes and systems that position Infineon for future growth

Who You'll Work With

- You will work with the finest manufacturing, engineering and business talent, in a fun and flexible culture
- You will have the opportunity to work with Infineon's senior leadership on high impact initiatives

Profile

- An Engineering or Math/Science graduate with 2-5 years of experience in Supply Chain, Operations or Planning
- Strong attention to detail, with ability to interface and get work done across organizational boundaries and cultures
- Prior experience with industry standard ERP systems (Oracle/SAP) and planning platforms (i2/JDA) a big plus
- Ability to work in dynamic, high pressure business conditions, and fully comfortable with uncertainty
- Technical proficiency in Excel (Macros) a must; exposure to PL/SQL a plus
- Exposure to Statistics and Operations Research concepts/projects is a big plus
