

Senior Staff Specialist Production Management (f/m /div)*

Job description

As Senior Staff Specialist Production Management, you will contribute to the product line manufacturing strategy & lead cross-functional teams over the global frontend and backend sites to improve quality, capacity and cost position for part of the product portfolio.

In your new job you will:

- Contribute to the **product line manufacturing strategy**
- **Lead cross-functional ramp-up teams** for innovative chip technologies and packages
- **Solve challenging problems** with a systematic approach and with cross-functional teams
- Organize and **assure product and technology transfers** in the Infineon production network
- **Be responsible for planning, coordination and execution** of assigned ramp up projects handled within Product Lines and act as ramp up project leader
- **Drive cost and TCM/TOM improvements**, identify idle costs in production and optimize value chain
- **Define and drive Quality improvement programs** together with QM department based on customer failure returns

Profile

You are best equipped for this task if you have:

- **More than 6 years of experience** in the semiconductor industry in different departments, such as R&D, Operations, Product- and Test Engineering or similar
- **A degree in Electrical Engineering, Physics, Industrial Engineering** or a related technical field
- **Proven Problem solving skills** and solid project management expertise
- **Excellent communication and negotiation skills** as well as international exposure
- **Entrepreneurial spirit to drive improvement** of ISD product performance, quality, and profitability to maximize the Total Operation Margin (TOM) of ISD GD Product Line
- **A deep understanding of the semiconductor technologies** and supply chain
- **Experience with semiconductor manufacturing** e.g. from process engineering and production control as well as ideally experience in assembly and test

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

Industrial Power Control (IPC) empowers a world of unlimited energy - Power semiconductors play a crucial role in increasing efficiency and reducing energy losses along the whole energy conversion chain. As the global leader in power semiconductors, Infineon IPC delivers leading products and solutions for smart and efficient energy generation, transmission and consumption. We strive to make this planet a greener place where sufficient energy is accessible to everyone – wherever and whenever they need it. At **Infineon in Villach** you shape the technologies of tomorrow and work in an international environment with colleagues from almost 70 nations. Your personal contribution will be valued and appreciated as the cornerstones of our success. And all that in beautiful surroundings which guarantee a high quality of life.

The **City of Villach** is located in the center of Carinthia, Austria's southernmost province, in close proximity to the Italian and Slovenian border. Due to its particular geographic location and the outstanding natural beauty of the region, Villach and the whole province of Carinthia have for generations been popular holiday destinations for people from all over the world. Living in Austria also has many social, health-care-related and economic perks. The country's social and health care system is among the best in the world and for decades numerous international surveys have singled out Austria as a particularly safe and wealthy country with a high quality of life. Villach benefits from its status as a "small town", offering everyday living at affordable prices in an outstanding setting.
