

Software QA Engineer for ModusToolbox (f/m/div)*

Job description

Do you want to create next generation's IoT products? State of the art technology is being created every day in Lviv and you can be an important part of it. Bring in all your experience and creativity and embrace a stimulating challenge. Join us now as a Software Engineer for our ModusToolbox projects

You will be a part of a ModusToolbox project. ModusToolbox software is a modern, extensible development environment supporting a wide range of Infineon microcontroller devices. It provides a flexible set of tools and a diverse, high-quality collection of application-focused software. These include configuration tools, low-level drivers, libraries, and operating system support, most of which are compatible with Linux, macOS, and Windows-hosted environments.

You'll be responsible for developing automated tests for ModusToolbox software and QT applications. (Like library manager, project creator etc.)
In your new role you will:

- Take part in new test methodologies and test systems development
- **Perform Test feasibility** and planning tasks
- **Collaborate with other colleagues from different expert areas**, namely software, digital hardware, operations, and marketing
- Test cases **automation** via writing scripts in **Python**
- **Debug** issues and triage the **failures**
- Support **Quality reporting**
- Enable continuous improvement and innovation
- Define **test strategy** and have test ownership of projects during their execution
- Working in **Agile teams** and **executing assigned tasks** during sprints

Profile

You're a methodic person who is passionate about software development. You might have a strong background in Python you're ready to make all the experience you gathered count!

You are best equipped for this task if you have:

- Previous **experience in Software/Firmware development or QA automation**
- **Programming skills in Python.**
- Experience with **Test Planning, Test Case Development, and Test Methodologies.**
- Knowledge of bug tracking tools (like Jira) and debugging methods.

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

** The term gender in the sense of the General Equal Treatment Act (GETA) or other national legislation refers to the biological assignment to a gender group. At Infineon we are proud to embrace (gender) diversity, including female, male and diverse.*
