

## Senior Expert Project Office Development Process (f/m/div)\*

### Job description

As our new Project Office Development Process Expert (DPE) you will support the deployment at MC by shaping Infineon's new Process Lifecycle Management (PLM) and in particular the Product Creation Process (PCP). With the background of MCs needs in Project Management operations, the DPE will interface to Infineon's Business Excellence Organization (BEX) to assure, the requirements of MC are understood, implemented and considered in the design and maintenance of the development processes. For the project managing staff at MC, you will act as the 1st point of contact for any PLM and PCP related issue, in particular, the setup of projects in the project operation tool iProjEx. If that sounds like the right challenge for you, then apply now!

In your new role you will:

- **Tailor consistently the PCP development processes** and setup of MCs projects in iProjEx
- **Drive the implementation of the MC requirement list** by the PLM team in alignment with MCs project roadmap (timeline and feature wise)
- **Represent MC** in the PLM related change boards
- Be the **owner for the Ensured Compliance Automotive Processors (ECAP) process** driving continuous improvement comprising official process releases and announcements
- **Drive the of harmonization of ECAP** and the **Development Process Owner** flow (DPO)
- Be responsible for the **MC-internal 1st level support** in case of PCP/PLM tool /process issues incl help to escalate to IT/BEX for Project Managers and Process users at MC
- Drive a proper **interfacing between Polarion** (used for software development) and **PLM** (used for Hardware development)
- Be the owner of the **Klusa Project Lists**

### Profile

You like to collaborate with multiple stakeholders and are able to communicate clearly and in a direct manner when sharing and simplifying complex information. Working with responsibility and connected freedom in decision making processes is a spur to you. You recognize new opportunities and cooperate across boundaries to pursue them effectively. At the same time, you remain aware of the big picture.

You are best equipped for this task if you have:

### At a glance

## Why Us

**Part of your life. Part of tomorrow.**

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

**– Automotive (ATV) shapes the future of mobility with micro-electronics enabling clean, safe and smart cars –**

Semiconductors are essential to realize key trends like eMobility, automated driving and secure, connected cars. Infineon **ATV** is the #1 semiconductor partner in the fast-changing automotive world, based on our system knowledge coupled with our passion for innovation and quality. We are a key driver in the ever-advancing pace of digitalization in the automotive industry.

**Automotive Microcontroller:** We make cars clean, safe and smart  
As a leading automotive microcontroller vendor, the Infineon business line Automotive Microcontroller (ATV MC) offers the industry's most comprehensive vehicle microcontroller portfolio and complements it with software. We serve automotive key applications, such as powertrain, advanced driver assist, chassis, body, instrument cluster and infotainment. We also address high-performance dependable computing, real-time domain and zone control, smart sensing and affordable artificial intelligence (AI) applications enabling the next stages of automated driving as well as higher levels of car connectivity, digitalization and security.  
Being at the core of this transformation, ATV MC contributes to shape the future of mobility enabling clean, safe and smart cars. So join us to create a better future

together.
