

## Senior Concept Engineering Manager (f/m/div)\*

### Job description

Do you want to actively shape the creation of premium products that enable clean, safe & smart cars? Are you passionate about implementation of new ideas? Are you able to effectively lead a team to high-quality results and foster the development of each individual? We're looking for a Senior Concept Engineering Manager.

You will be part of **Body Power leadership team in Bucharest** and lead an experienced **team of concept engineers and functional safety engineers**. You will find an interesting multinational working environment waiting for you with interfaces to other teams in Bucharest and at other sites.

In your new role you will:

- **Lead the team** that creates new leading edge automotive MOTIX™ ICs such as BLDC Driver ICs ASIL-D
- **Explore and combine new sources of innovation** in addition to product and technology innovation
- **Anticipate** future market needs and develop competitive solutions
- Collaborate with global teams to **bring ideas to life**, balancing risks and opportunities
- **Coordinate the implementation of new methodology and tools** such as Model-Based Systems Engineering (MBSE)
- Be responsible for **people development**, performance assessment including salary reviews
- **Take initiative and ownership to address stringent problems** including focus team lead.

### Profile

You have a driver mentality and passionately aim for results by motivating others for your targets. You are able to quickly establish a successful cooperation and demonstrate high quality standards for yourself and other people. You combine deep expertise with a broad understanding in business context.

You must also have:

- A degree in **Electrical Engineering or a similar degree**
- **At least 5 years of experience** as ARM™ AMS SoC architect/ design/ firmware within the semiconductor industry
- **Proven leadership** as technical lead
- Passion to **implement and market creative ideas**
