

Project Manager Sense and Control (f/m/div)*

Job description

You love to work in international teams and dynamic environments? You have a passion for managing, organizing and controlling projects? You should definitely apply for our international team at Infineon Villach!

As a Project Manager for Magnetic Sensors you drive the development from product definition to volume production. You will be responsible for managing, organizing and controlling projects for complex sensor applications and for assuring its progress and success.

In your new role you will:

- **Manage and control** the entire project life-cycle as main contact person for all questions regarding the project
- Be fully **responsible for all operational decisions** in the project and for the successful achievement of all project targets (time, quality, cost and budget)
- **Manage product development projects** / sub projects with strong connection to Frontend technologies and Backend processes
- **Organize** the activities and resources needed for the project to **ensure timely release** of each milestone
- Conduct a forward-looking **risk management**. In close cooperation with your stakeholders, you **identify possible mitigation measures** and/or backup scenarios
- Continuously **focus on project quality**, assess progress and ensure that goals are met even in the face of challenges

This position is part of the Project Management Career Path. It provides an attractive career opportunity for employees who focus on managing projects and functional leadership of project team members. You want to learn more about the role as a Project Manager? Check out our profile story!

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

– Automotive (ATV) shapes the future of mobility with micro-electronics enabling clean, safe and smart cars –

Our semiconductors are essential for supporting the automotive megatrends: electromobility, automated driving, connectivity, and advanced security. They link the real and the digital world, driving the ever-advancing pace of automotive digitalization. Infineon **ATV** is the number one semiconductor partner in the fast-changing automotive world, based on our system knowledge and our passion for innovation and quality.
