

Senior Staff DevOps Engineer

Job description

You help us to continuously improve the usability and functionality of our Kubernetes integrations You actively contribute to our Kubernetes Operators and have the opportunity for full-stack development You work on Open Source projects and provide important value to the Cloud Native community

- You help us to continuously improve the usability and functionality of our Kubernetes integrations
- You actively contribute to our Kubernetes Operators and have the opportunity for full-stack development
- You work on Open Source projects and provide important value to the Cloud Native community
- You develop innovative solutions together with our technology partners like RedHat, AWS, Google or Microsoft
- You will work with the development and platform teams to ensure the reliability, availability and security of the services
- You will implement solutions for extensive infrastructure tasks
- You are supporting modern CI/CD Pipelines
- You are responsible for the production environments and keeping them running together with the platform teams
- You will further develop modern SRE practices in a motivated development team

Profile

- You have a degree in Computer Science, Software Engineering or similar practical experience
 - At least 5 years of professional experience as SRE or DevOps Engineer with focus on operations
 - You speak fluently Golang, Java, C++ or a similar language and are eager to work with Cloud Native technologies
 - You love to work in the Open Source area (GitHub) and to learn new technologies
 - Experience with scripting languages such as Python, Golang or Java
 - Experience with Linux operation systems
 - Experience with Cloud, Docker and Kubernetes
 - Know-How in logging & monitoring (EFK Stack, Prometheus, Grafana)
- Very good English knowledge, German is a plus
