

## Senior Staff DevOps Engineer

### Job description

You help us to continuously improve the usability and functionality of our Kubernetes integrations You actively contribute to our Kubernetes Operators and have the opportunity for full-stack development You work on Open Source projects and provide important value to the Cloud Native community

- You help us to continuously improve the usability and functionality of our Kubernetes integrations
- You actively contribute to our Kubernetes Operators and have the opportunity for full-stack development
- You work on Open Source projects and provide important value to the Cloud Native community
- You develop innovative solutions together with our technology partners like RedHat, AWS, Google or Microsoft
- You will work with the development and platform teams to ensure the reliability, availability and security of the services
- You will implement solutions for extensive infrastructure tasks
- You are supporting modern CI/CD Pipelines
- You are responsible for the production environments and keeping them running together with the platform teams
- You will further develop modern SRE practices in a motivated development team

### Profile

- You have a degree in Computer Science, Software Engineering or similar practical experience
  - At least 5 years of professional experience as SRE or DevOps Engineer with focus on operations
  - You speak fluently Golang, Java, C++ or a similar language and are eager to work with Cloud Native technologies
  - You love to work in the Open Source area (GitHub) and to learn new technologies
  - Experience with scripting languages such as Python, Golang or Java
  - Experience with Linux operation systems
  - Experience with Cloud, Docker and Kubernetes
  - Know-How in logging & monitoring (EFK Stack, Prometheus, Grafana)
- Very good English knowledge, German is a plus
