

Principal Device Engineer

Job description

Do you enjoy the challenge of working for an innovative company with leading-edge technology? Do you thrive in an environment working with people and bringing brilliant designs to market? If so, this may be the right opportunity for you!

In your new role you will:

- Create and maintain layout design rules. Collaborate with CAD team to implement design rules in CAD flow. Collaborate with design and CAD teams to resolve product design DRC issues. Support new product tape-out process
- Create and maintain silicon device electrical spec. Collaborate with modeling and design teams to support new product design
- Design and characterize ETEST structures. Conduct statistical analysis of ETEST data. Optimize devices to improve product yield, performance and reliability
- Introducing new product in Foundry fabs, including scribe line design, mask making, Fab process setup, silicon experiment, and yield ramp-up
- Collaborate with Fab, product and FA teams to resolve product failure

Profile

You are best equipped for this task if you have:

- 5 years of industry working experience
- Advanced degree in Electrical Engineering, Applied Physics, or a related field
- Demonstrated expertise in semiconductor **device physics**, and **semiconductor** device characterization techniques
- Familiarity with advanced semiconductor processes
- Knowledge in **design of experiment** and **statistical data analysis**
- Non-volatile memory device experience is a plus
- Ability to communicate technical topics clearly in both oral and written form
- Accountable, self-motivated, and a good team player

Automotive (ATV) shapes the future of mobility with microelectronics enabling clean, safe, and smart cars –

Our semiconductors are essential for supporting the automotive megatrends: electromobility, automated driving, connectivity, and advanced security. They link the real and the digital world, driving the ever-advancing pace of automotive digitalization. Infineon **ATV** is the number one semiconductor partner in the fast-changing automotive

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

Infineon Technologies Memory Solutions is an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex (including pregnancy, childbirth, or related medical conditions), gender identity, national origin, ancestry, citizenship, age, physical or mental disability, legally protected medical condition, family care status, military or veteran status, marital status, domestic partner status, sexual orientation, or any other basis protected by local, state, or federal laws. Applicants with questions about access or requiring a reasonable accommodation for any part of the application or hiring process should contact the Talent Network by phone at (408) 503-2194.

Employment at Infineon is contingent upon proof of your legal right to work in the United States under applicable law, verification of satisfactory references and successful completion of a background check and drug test, and signing all your onboarding documents .

In some instances, if applicable, U.S. export control laws require that Infineon obtain a U.S. government export license prior to releasing technologies to certain persons. This offer is contingent upon Infineon's ability to satisfy these export control laws as related to your employment and anticipated job activities. The decision whether or not to submit and/or pursue an export license to satisfy this contingency, if applicable, shall be at Infineon's sole discretion.

IMPORTANT NOTICE:

Infineon is requiring all new U.S. employees and contractors to be fully vaccinated against COVID-19. Full vaccination is defined as two weeks after both doses of a two-dose vaccine or two weeks since a single-dose vaccine has been administered. Anyone unable to be vaccinated, either because of a sincerely held religious belief or a medical condition or disability that prevents them from being vaccinated, can request a reasonable accommodation.

Infineon Technologies takes data privacy and identity theft very seriously. As such, we do not request personally-identifiable information (PII) from applicants over the internet or electronically. Please kindly refrain from disclosing your PII electronically during the application process or to unauthorized websites that may purport to be Infineon or any of our affiliates.
