

Senior Project Manager Design Systems (f/m/div)*

Job description

Ever wondered how all the new semiconductor technologies are finally enabled for IC design and production? We create so called 'Design Systems' and provide them to our colleagues worldwide - including methodology, design packages, run sets as well as efficient design environments and flows. In order to coordinate all of these topics, we need you as a Senior Project Manager Design System. You take over responsibility for the development and maintenance of the design system for a certain technology - covering steps from product idea to end of life. Our Project Management Career is meant to provide an attractive career opportunity for employees who focus on managing projects and functional leadership of project team members.

You are a self-motivated individual who is personally committed to the customer's concerns. You see problems as an incentive and opportunity for constant improvement and contribute to a culture of dialogue and feedback.

In your new role you will:

- **Lead design system projects for the respective technology platform** according to the Infineon processes for development and maintenance
- Enable that all **building blocks of the design system** fit together properly
- Be responsible for **planning, target setting, execution**
- **Project responsibility** with respect to function/performance, quality, schedule, R&D cost, cost efficiency etc.
- **Setup a roll-out strategy** towards product development projects
- **Drive risk management/risk mitigation of the design system** and the related development process
- **Cooperate with various business lines** to assure proper, in-time delivery and adequate functionality

Profile

You are a self-motivated individual who is personally committed to the customer's concerns. You see problems as an incentive and opportunity for constant improvement and contribute to a culture of dialogue and feedback.

You are best equipped for this task if you have:

- A degree in **electrical engineering, information technology or physics**

At a glance

Location: **Munich (Germany)**
Job ID: **341471**
Start date: **as soon as possible**
Entry level: **3-5 years**
Type: **Full time**
Contract: **Permanent**

Contact

Daniel Lichtblau
Talent Attraction Manager

- At least **6 years of work experience in the semiconductor business**, preferably in an R&D environment with insights into design systems: design/technology packages, design flows and methodologies or Electronic Design Automation (EDA)
 - Thereof **4 or more years of experience in project management**
 - Solid **MS Office as well as UNIX skills**
 - A good sense for **intercultural differences**
- Very good English language skills**, German skills are a plus

Benefits

- **Munich:** Coaching, mentoring networking possibilities; Wide range of training offers & planning of career development; International assignments; Different career paths: Project Management, Technical Ladder, Management & Individual Contributor; Flexible working conditions; Home office options; Part-time work possible (also during parental leave); Sabbatical; On-site creche and kindergarden with 120 spots, open until 6pm; Holiday child care; On-site social counselling and works doctor; Health promotion programs; On-site gym, jogging paths, beachvolleyball, tennis & soccer court; On-site canteen; Private insurance offers; Wage payment in case of sick leave; Corporate pension benefits; Flexible transition into retirement ; Performance bonus; Reduced price for public transport and very own S-Bahn station; Access for wheelchairs

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

The central R&D organization „**Design Enabling and Services**“ (**DES**) provides the design environment to the different Infineon product development teams. With state-of-the-art design methods, building blocks and a wide range of product development services DES supports Infineon's advanced IC development from early high level system models to verified products ready for manufacturing.

** The term gender in the sense of the General Equal Treatment Act (GETA) or other national legislation refers to the biological assignment to a gender group. At Infineon we are proud to embrace (gender) diversity, including female, male and diverse.*
