

Principal Software Engineer

Job description

The Connected Secure Systems (CSS) segment offers comprehensive systems for a secure, networked world with a portfolio built around reliable, trendsetting microcontrollers as well as wireless connectivity and security solutions. Over the past decades, CSS has developed microcontroller, Wi-Fi, Bluetooth and combined connectivity solutions (known as connectivity combos) and hardware-based security technologies. The products are used in a broad range of applications: from consumer electronics, IoT and home appliances to IT equipment, cloud security and networked cars all the way to credit and debit cards, electronic passports and IDs. With its leading technologies in the areas of computing, connectivity and security, CSS makes a decisive contribution to protecting today's and tomorrow's networked systems.

Key responsibilities of the position involve:

- Design, development, and deployment of 802.11 MAC features (standard and proprietary) on Infineon's Wi-Fi chipsets.
- Work through solutions involving end to end silicon life cycles- architecture definition to solution delivery.
- Work with various cross functional teams including but not limited to host software, systems and RTL design teams.
- Analyze, debug and resolve all MAC issues that may be seen across different internal validation platforms and external customer platforms.

Profile

- Strong C programming skills.
- Strong experience in embedded software.
- Strong debugging skills
- Working Knowledge of ARM architecture.
- Familiarity with IEEE 802.11 standards desirable.
- Experience working in any wireless communication chipset desirable.

Benefits

- **Bangalore:** Coaching, mentoring & networking possibilities ; Wide range of training offers & planning of career development; Regional and local talent programs; International assignments; Career paths: Management career, Project management career, Technical ladder career, Individual contributor career, Professional career; Flexible work timing, Part time work, Work from home;

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.
