

# Industrial Engineering Team Lead (f/m/div)\*

## Job description

Are you an open-minded person with excellent planning and organizational skills? Do you consider yourself a leader but also with a strong technical background and experience? Have you a proactive, innovative character and a strong team spirit? Then we have the perfect match for you at Infineon Cegléd: come and join us as an Industrial Engineering manager!

In this role you will be the lead of a team with up to 10 Industrial engineers, and driving for productivity improvement on the site. You will act both as an expert and mentor, guiding and motivating your team for best results.

In your new role you will:

- Be responsible to **lead an Industrial engineering team**.
- Take the **responsibility for productivity improvements with cross functional teams**.
- **Analyze and define operational efficiency opportunities** for Personnel, Capital & Material cost.
- **Provide guidance to IE engineers**.
- **Deployment of IE tools and methodologies** in conducting studies, data collection and projects.
- **Set and establish** manufacturing **standards** and **performance KPIs**.
- **Automation of data collection and evaluation**.

## Profile

You are a technical expert but also with a strong leadership background. You demonstrate strong communication skills, know how to establish lasting relationships and networks, clarify areas of responsibility and coordinate the work within your team. Your creative thinking and proactive personality allows you to find new ideas and better ways of working, being able to trigger those changes in your team.

You are best equipped for this task if you have:

- Bachelor or Master Degree in **Mechanical Engineering, Computer Science, Industrial Engineering**, or related fields.
- **5 years or more professional experience in industrial engineering, planning** or other technical field related to manufacturing of electronic components, with some **experience managing projects with interdisciplinary teams**.
- Previous contact with **operation research and simulation**.
- **Lean and/or 6Sigma** knowledge and practice.
- Knowledge of SAP or other MRP.
- **MTM / REFA** knowledge (MTM-UAS preferred).
- **AutoCAD (2D)** knowledge.
- **Fluent in Hungarian and English languages. German would be a plus.**

Please send us your CV in English.
