

Concept Engineer (f/m/div)*

Job description

Are you looking for a new challenge? Are you used to work proactively and interdisciplinary? Are you ready to bring your know-how into an innovative, future-oriented company? Then Infineon Technologies Austria is the place to be for you!

In your new role you will:

- **Development of concepts** for successful new products
- **Enable the growth** in the field of **gate drivers, gate biasing ICs for 5G mobile communication** and similar high-voltage mixed signal ICs
- **Guide full chip developments** in collaboration with our Business Lines
- Close **cooperation** with our team of **experienced concept engineers**
- Be the **main partner for our customers**
- **Guide the design team** throughout the development process
- **Enhance existing background in analog mixed signal design** and knowledge about high-voltage technologies
- **Create new network to all different type of products** that fit to Infineon Business Model

Profile

You are best equipped for this task if you have:

- A **university / university of applied sciences Master degree in Electrical Engineering** or comparable
- More than **3 years of experience in the environment of chip development**
- **Experience in mixed signal chip design** and high-voltage technologies
- **Fluent English skills**, German as a plus
- An **agile and team oriented working style**
- Interest in **strong customer interfacing**

We offer competitive salaries and additional benefits based on your performance, experience and qualification. The employment is in accordance with the collective salary and wage agreement for employees of the electrical and electronics industry, employment group F-G (<https://www.feei.at/wp-content/uploads/2022/05/minimum-salaries-white-collar-workers-2022.pdf>). The monthly salary is paid 14 times p.a. We offer a higher compensation depending on your expertise and skills.

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

The central R&D organization „**Design Enabling and Services**“ (DES) provides the design environment to the different Infineon product development teams. With state-of-the-art design methods, building blocks and a wide range of product development services DES supports Infineon's advanced IC development from early high level system models to verified products ready for manufacturing.

The **City of Villach** is located in the center of Carinthia, Austria's southernmost province, in close proximity to the Italian and Slovenian border. Due to its particular geographic location and the outstanding natural beauty of the region, Villach and the whole province of Carinthia have for generations been popular holiday destinations for people from all over the world. Its unique landscape combines mountains and valleys, lakes and rivers, city and countryside. In addition to the favorable geographic location, living in Austria also has many social, health-care-related and economic perks. The country's social and health care system is among the best in the world and for decades numerous international surveys have singled out Austria as a particularly safe and wealthy country with a high quality of life.
