

Staff Engineer Security Evaluation (f/m/div)*

Job description

Would you like to take on the challenging role of being a security evaluator of our high security solutions (some examples: smartcard, embedded security controllers, payment and government ID applications)? Then come and join our team as Staff Engineer Security Evaluation (f/m/div)*! Make sure to apply now! The Technical Ladder is a special career path for those who share innovative ideas, demonstrate comprehensive technical knowledge, show thought leadership, possess problem solving abilities and are able to create business value.

In your new role you will:

- **Assess security concepts and implementations**
- Conduct **theoretical weakness analysis** like code review and concept review
- **Develop test-SW for security penetration testing** on microcontrollers
- **Setup and improve test-benches** for security evaluation
- **Perform practical attacks** as fault injection, logical and functional tests, fuzzing
- Act as an **expert in specific areas of security**, providing **state-of-the-art consultancy**

Profile

You develop, implement, and market creative ideas, and you have a clear notion of how innovation contributes to the commercial success of the company. You set yourself ambitious goals and take the initiative and act responsibly. You strive for continuous improvement, feel responsible for and contribute to the team success.

You are best equipped for this task if you have:

- A **technical degree** ideally in **Electrical Engineering, Mathematics** or similar
- **At least 3 years of professional experience** in the world of **embedded hardware and software security assessment**
- Ideally, you already have worked in an **IT Security Evaluation Facility (ITSEF)**, e.g. in the scope of common criteria evaluation
- Experience with **programming languages like** Java, C, C++, Python and Matlab
- An **independent working style**, striving to bypass conventional approach, combined with the **willingness to keep on learning**
- **Fluent English and German** skills

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

– Connected Secure Systems (CSS) delivers security for the connected world –

The Connected Secure Systems (CSS) segment offers comprehensive systems for a secure, networked world with a portfolio built around reliable, trendsetting microcontrollers as well as wireless connectivity and security solutions. Over the past decades, CSS has developed microcontroller, Wi-Fi, Bluetooth and combined connectivity solutions (known as connectivity combos) and hardware-based security technologies. The products are used in a broad range of applications: from consumer electronics, IoT and home appliances to IT equipment, cloud security and networked cars all the way to credit and debit cards, electronic passports and IDs. With its leading technologies in the areas of computing, connectivity and security, CSS makes a decisive contribution to protecting today's and tomorrow's networked systems.
