

Senior Staff Engineer DFT Implementation (f/m/div)*

Job description

Would you like to review and contribute to the DFT architecture and implement and verify DFT logic on RTL and Gate-level? If this sounds interesting to you, then make sure to apply now! Our team is waiting for you! With this position, you will enter our "Technical Ladder" career path. The Technical Ladder is a special career path for those who share innovative ideas, demonstrate comprehensive technical knowledge, show thought leadership, possess problem solving abilities and are able to create business value.

In your new role you will:

- **Review and contribute** to the **DFT architecture**
- **Implement and verify DFT logic** on RTL and Gate-level
- **Review and define DFT timing constraints**
- **Closely collaborate** with **digital design** and **physical design team**
- Conduct **feasibility studies**
- **Cooperate closely** with the **DFT methodology experts** and **drive continuous improvement**

Profile

You strive for continuous improvement and feel responsible for and contribute to the team's success. You are able to quickly establish a successful cooperation and clarify areas of responsibility, coordinate your work with colleagues, and regularly share your insights with them. You have a clear notion of how innovation contributes to the commercial success of the company and concentrate your creativity and knowledge on producing results with real added value.

You are best equipped for this task if you have:

- A degree in **Electrical Engineering, Computer Science** or a similar domain
- **At least 5 years of experience in all relevant steps of DFT implementation** (from scan-insertion until pattern verification) including timing closure and a solid understanding of specific flows and tools
- **Hands-on experience** with **digital design, logic synthesis** and **physical implementation**
- **Good team player** and **willingness to take over responsibility**
- **Very good English** language skills - German would be beneficial

At a glance

Location: **Munich (Germany)**
Job ID: **342835**
Start date: **as soon as possible**
Entry level: **5+ years**
Type: **Full time**
Contract: **Permanent**

Benefits

- **Munich:** Coaching, mentoring networking possibilities; Wide range of training offers & planning of career development; International assignments; Different career paths: Project Management, Technical Ladder, Management & Individual Contributor; Flexible working conditions; Home office options; Part-time work possible (also during parental leave); Sabbatical; On-site creche and kindergarden with 120 spots, open until 6pm; Holiday child care; On-site social counselling and works doctor; Health promotion programs; On-site gym, jogging paths, beachvolleyball, tennis & soccer court; On-site canteen; Private insurance offers; Wage payment in case of sick leave; Corporate pension benefits; Flexible transition into retirement ; Performance bonus; Reduced price for public transport and very own S-Bahn station; Access for wheelchairs

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

– **Automotive (ATV) shapes the future of mobility with micro-electronics enabling clean, safe and smart cars** –

Semiconductors are essential to realize key trends like eMobility, automated driving and secure, connected cars. Infineon **ATV** is the #1 semiconductor partner in the fast-changing automotive world, based on our system knowledge coupled with our passion for innovation and quality. We are a key driver in the ever-advancing pace of digitalization in the automotive industry.

Microcontroller

The Infineon business segment **MC** (Microcontroller) is strongly growing with latest TriCore Microcontroller generation AURIX, offering latest innovation in performance, connectivity, power consumption, safety and security. Furthermore, the key application segments are targeting segments with high innovation potential and highest market growth such as Advanced driver Assistant systems. As part of the automotive business unit the focus of MC is on the requirements of the automotive market from motor cycle to truck applications. # **AutomotiveMicrocontroller**

** The term gender in the sense of the General Equal Treatment Act (GETA) or other national legislation refers to the biological assignment to a gender group. At Infineon we are proud to embrace (gender) diversity, including female, male and diverse.*
