

Specialist Product Application Engineering (f/m/div)

★

Job description

Lighting - and especially LED - is a key differentiating factor for carmakers in terms of brand recognition, safety, reliability, energy efficiency, and user experience. We are looking for a Product Application Engineer for Automotive LEDs Interior Lighting. Is that you? Apply now and take the next step in your career!

As a Product Application Engineer, you will be responsible for design-in collaterals in the commercialization phase. Furthermore, being part of the Technical Marketing team, you will provide technical customer support for Automotive LEDs Interior Lighting products.

In your new role you will:

- Be responsible for **technical Go-To-Market collaterals**, such as application notes, evaluation boards, final datasheet, and application software support;
- **Provide** second or third level **technical support**;
- Be the **Technical Customer Interface** on product level in **Go-To-Market phase**;
- **Support Product Management** with technical and engineering know-how;
- **Provide technical product training** to internal/external partners;
- **Perform benchmarking** and develop 'fighting guides'.

Profile

You are a methodical thinker and have the ability to take initiative and produce results. You appreciate inputs from your colleagues and are capable of collaborating effectively within a talented team. Furthermore, you are an enthusiastic person who is willing to learn and improve your skills.

You are best equipped for this role if you have:

- A **degree in Electronic Engineering, Computer Science** or another relevant field;
- Basic **programming skills** are required;
- Experience with **microcontrollers** is an advantage;
- A **team player** attitude;
- **Fluency in English** (mandatory).

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

– Automotive (ATV) shapes the future of mobility with microelectronics enabling clean, safe, and smart cars –

Our semiconductors are essential for supporting the automotive megatrends: electromobility, automated driving, connectivity, and advanced security. They link the real and the digital world, driving the ever-advancing pace of automotive digitalization. Infineon **ATV** is the number one semiconductor partner in the fast-changing automotive world, based on our system knowledge and our passion for innovation and quality.
