

Production Systems Manager (f/m/div)*

Job description

Would you like to contribute to the development of our Cegléd's manufacturing site? Are you passionate about developing our production systems framework and deploying state-of-the-art methods in order to achieve excellent operational results? Do you love communicating with people, enabling them and fostering their talents? If you see yourself in this description, we believe that you would be the perfect fit for the Production Systems Manager in our team in Cegléd.

As a Production Systems Manager, you will lead the Production Systems organization responsible for the shop floor stability programs/activities in order to exceed all 3 operational excellence pillars: Quality, Productivity and Speed. You will also be responsible for always look for improvement possibilities while keeping your team motivated.

In your new role you will:

- Drive as a Program Manager **key projects/programs**, such as GreenLine and 6 STEPS.
- Be responsible for **deploying Lean Methods**, such as Standard Work, 5S and Visual Management.

Profile

You are enthusiastic and energetic! You have a passion for striving for excellence and ensuring a disciplined execution. Your communication skills and ability to motivate others are outstanding; your energy is contagious and you're able to inspire and lead the organization to successfully accomplish it. Furthermore, you are a great team player, being able to quickly establish sustainable relationships.

You are best equipped for this task if you have:

- **Degree in a Scientific and Engineering** field. Master's degree would be an advantage.
- At least **5 years of experience** in **Engineering Management, Unit Process Engineering or Quality Assurance** in a manufacturing environment.
- Affinity towards **digitalization** and **programming**.
- Background in **Program Management** is a plus.
- Knowledge of **quality methods/tools**, such as **Lean Methods** (5S, Standard Work, etc.) and **Six Sigma**. Six Sigma Black Belt would be an advantage.
- **Dynamic** and **communicative** personality.
- **Leadership skills** and ability to drive others.

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

Backend

The **backend segments** enable the development of comprehensive innovation across the entire value chain: starting with chip manufacturing, to wafer testing, preassembly, package development and development of new materials. The backend cluster combines the competencies for planning, productivity, innovation and quality, assembly and testing.

** The term gender in the sense of the General Equal Treatment Act (GETA) or other national legislation refers to the biological assignment to a gender group. At Infineon we are proud to embrace (gender) diversity, including female, male and diverse.*
