

Staff Engineer Unit Process Development - Marking /Trim Form/Package Saw

Job description

In this role, you will develop new processes and ensure design to cost & design to manufacturing, actively challenge current processes looking for improvement, efficiencies, and value engineering.

In your new role you will:

- Establish and set up new assembly process capabilities for Laser Marking/Trim Form/Package Saw process.
- Identify problems or deviations and recommend and implement corrective actions.
- Support new package development, ramp up, platform extensions, and innovations
- Perform data gathering according to PBHB requirements and recorded into SPACE
- Support end-to-end needs on tooling and machine ramp-up requirements.
- Conduct process knowledge transfer to the Segment team. Ensure all lessons learned are well explained and understood.

Profile

You are best equipped for this task if you have:

- Master / Bachelor Degree in Mechanical/Manufacturing/Process Engineering.
- Minimum 5 Years of IC/Semiconductor assembly industry.
- Possess in-depth knowledge in Laser Marking/Trim Form/Package Saw process, equipment, material and blade, and their interactions.
- Independent with good communication and coordination skills.
- Demonstrates an ability to lead a team for problem-solving.
- Analytical mind and high initiative to challenge him/herself to move to the next level of competency.
- Knowledgeable in IC Packaging Assembly Process Flow.
- Experience in analytical tools (i.e. JMP, 8D, FMEA, SPC, DMAIC approach to problem-solving) and design of experiments.
- Tooling Design and Simulation knowledge will be an added advantage.
