

Senior Project Manager Transfer Wafer Technology (f/m/div)*

Job description

In this position, you will be responsible for wafer technology transfers into our new 300mm wafer fabs and global project teams.

In your new role you will:

- Manage several **wafer technology transfer projects over their entire life cycle** with full responsibility for achieving the project targets on-time and on-budget with high quality
- **Form and lead a project teams** of moderate complexity with subprojects in frontend, test, preassembly and backend
- Structure projects, balance team skills, ensure compliance and **hold the team accountable**
- **Interface, manage and align the transfer projects** with the respective divisions within Infineon as the internal customers
- **Plan and prepare new transfer projects** in close alignment with the transfer portfolio management, division, FE and BE technology experts and capacity planning
- Adhere to best practice standards and the transfer methodology, **strive for continues process improvements** together with the involved organizations

Profile

You are able to translate the strategy into ambitious goals and make sure that it becomes a binding guideline for people's actions. You are aware of the strengths, needs for development, and motivational drivers of your team members and deploy them according to their competences. You solve complex problems, take a new perspective on existing solutions and judge based on analysis of multiple sources of information. You win with your project teams in an environment of trust and respect.

You are best equipped for this task if you have:

- A **university degree** in electrical engineering, industrial engineering, Chemistry, Physics or a comparable qualification.
- About **6 years of experience in the semiconductor industry** with broad R&D experience in different departments, and thereof 4 years' experience in leading projects.
