

Senior Engineer IT Operational Services

Job description

Functional support for the IT services "FacilityManagement, Environment, Safety & Health and Maintenance Solutions" as IT Application Owner for mainly non-SAPsolutions

In your new role you will:

- Functional support for the IT services "FacilityManagement, Environment, Safety & Health and Maintenance Solutions" as IT Application Owner for mainly non-SAPsolutions.
- Provide operational IT support for FM, EHS, and Maintenance solutions
- Act as an in-house consultant for your IT applications.
- Active support process and system consolidation activities.
- Analyze existing process implementations.
- Create solution proposals and blueprints for change requests and project requests.
- Act as Project Manager for IT projects in various production sites at Infineon mainly in Europe.
- Ensure quality for customizing / development delivered by external service Providers.
- Conduct in-house customer training.

Profile

You are best equipped for this task if you have:

- This position requires a university degree in Computer Science or Business Administration.
- Sound technical knowledge about IT Infrastructure setups is desired.
- SAP ERP skills in the area of SAP PM/EAM or EHSM are a plus.
- You remain focused on solutions, open, and flexible even when you are under pressure.
- Last but not least you convince me because of your very good communication skills in English.
