

## Senior Project Manager IP Design (f/m/div)\*

### Job description

Are you passionate for both, people management and project management? Do you like working in an intercultural environment with project teams that are spread across different time zones and locations? Then you should join us as a Senior Project Manager for IP Design. The PJM Career is meant to provide an attractive career opportunity for employees who focus on managing projects and functional leadership of project team members.

In your new role you will:

- Be **responsible for project management of non-volatile memory (NVM) IP modules** for our internal customers
- **Manage a diverse project team** and take ownership to provide NVM IP modules in time, at cost, with defined functionality and in committed quality
- **Align requirements** (functionality, quality, schedule, budget, others) **with customer stakeholder**
- Be in charge of **project planning** (resources, schedule, technical deliverables), **tracking** (schedule, cost) and **reporting**
- Handle **e escalation management and customer stakeholder management**
- **Take care of a close cooperation** and interaction **with all parties**

### Profile

You pursue goals ambitiously. In doing so, you recognize and use different areas of expertise and skills of your team members. Furthermore, you cautiously listen to the customers and consider their point of view and ideas.

You are best equipped for this task if you have:

- A degree in **Electrical Engineering, Physics** or similar
- **Several years of experience in chip or IP project management** mandatory
- A **certification in project management** (e.g. IPMA, PMI) is a plus
- An **ambitious attitude** and be able to **manage risks in challenging environment**
- The willingness to **strive for excellence**: think in solutions, improve continuously, execute efficiently
- **Fluent English communication skills**

## Why Us

### Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

The **Frontend (FE)** cluster offers a broad range of manufacturing competence specialized in high-quality logic products. The portfolio represents Power, Bipolar, Sensor, Passive and Diode technologies as well as CMOS, RF-CMOS and embedded flash technologies. The manufacturing sites in Dresden, Kulim, Regensburg and Villach are committed to Operational Excellence with strong customer focus.

*\* The term gender in the sense of the General Equal Treatment Act (GETA) or other national legislation refers to the biological assignment to a gender group. At Infineon we are proud to embrace (gender) diversity, including female, male and diverse.*
