

Director Program Management (f/m/div)*

Job description

You are keen in working strategic in a role as Director Program Management? You want to play a key role in the business development and success of our Automotive division? Then take the next step in your career and apply to our Director Program Management position. In this role you will be overseeing projects from a strategic perspective, guide projects in operational matters and develop and deploy product line strategy.

In your new role you will:

- Strengthen our program management organization and **be a key member** of the **product line leadership team** and **of the extended business line leadership**
- **Drive multi-site and cross-functional product development programs** in accordance with the Business Line and Product Line strategy
- Act as the **product line representative** and stakeholder interfacing with project managers and the R&D organization
- As Project Owner up to project class B, define **strategic project targets** (budget, time, scope) and ensure the projects are executed within these boundaries
- **Contribute to product line strategy process** and own the product development aspect of strategy deployment
- **Drive analysis of optional approaches** and feasibility in an early stage in order to ensure a structured decision making
- **Mediate and decide** in case of conflicting goals between projects and line functions and play an active role in resolving resource bottle necks

Profile

Even in changing circumstances and when under pressure you remain focused on solutions and produce results. You can anticipate what potential challenges are laying ahead of a project and you develop suitable approaches to avoid delays or cost overruns. You address disagreements and conflicts professionally and objectively and ensure a clear and transparent prioritization and structured decision making.

You are best equipped for this task if you have:

- A degree in **Electrical Engineering, Physics** or similar
- At least **8 years of job experience** in automotive or semiconductor industry within **R&D** in different departments, thereof preferably more than **5 years of experience in project management** or **functional leadership**
- Experience in **target setting** for projects as well as **escalation and problem management** with a strong **focus on solution finding**
